7.3 Text Properties

CSS provides a variety of text-related properties that allow you to control the appearance and styling of text within HTML elements. Here are some common CSS text properties:

1. color: Specifies the color of the text.

2. font-family: Defines the font or font stack used for text.

3. font-size: Sets the size of the font.

4. text-align: Aligns the text horizontally within its container.

5. text-decoration: Adds decorations to the text, like underline or line-through.

6. letter-spacing: Adjusts the space between individual characters.

7. word-spacing: Controls the space between words.
